

# Maintain the performance of your assets with AssurePoint\* OnDemand Services

Consider using GE Healthcare's AssurePoint OnDemand Services to source replacement parts for your GE Healthcare clinical assets.

## Quality. Compliance.

GE Healthcare continuously assesses our parts' performance and uses this data to improve quality. We strive to ensure that our parts have the latest design enhancements to optimize your system's performance and service life.

GE Healthcare parts go through a rigorous validation process to help support your compliance programs, so you can be secure in your purchasing decision – more critical than ever in today's increasingly strict regulatory environment.

In addition, GE Healthcare quality engineers inspect and audit suppliers to make sure they comply with GE Healthcare quality standards and pertinent regulations.

## Easy Ordering. Get it fast.

Why waste time shopping around for parts? Order from GE Healthcare and you will receive knowledgeable customer service with prompt, accurate delivery. Our technical support specialists can help you get exactly the parts you need. In as little as one minute, your order is entered and a delivery date confirmed. Most parts, including top critical parts, leave our warehouse on the day of your order. You will receive a shipping notification with tracking number so you can track your shipment online until it arrives at your door.

## Keep it in stock. Have it when you need it.

There's only one-way to beat fast delivery: Stock a strategic inventory. We'll help you select and stock recommended spares so you can make repairs immediately, reduce downtime, and minimize rescheduling of patients. You'll also minimize expedited shipping charges, and you can save even more with bulk rates on regular shipments. Bulk orders save administrative costs, too – fewer purchase orders to write, sign-offs to get, parcels to track, deliveries to distribute, invoices to pay.

## Save green. Be green.

GE Healthcare has an exchange plan that lets you trade in your used part for a part that has been repaired to meet OEM performance specifications. The used part you exchanged will be repaired for use by another customer or sent to our award-winning Renewable Resources material recycling facility. With our exchange plan, you can rest assured that we are supporting your sustainability goals.

## GE Service Engineers – exceptional support for you

GE Healthcare has one of the largest, most highly trained service forces in the industry. Its field engineers average 15+ years of experience, and they bring exceptional technical skills, advanced tools for performance optimization and personal dedication to supporting your equipment. Their thousands of hours of rigorous training continue to raise the standard for service expertise, and they're equipped with the latest in remote service technologies.

## Buy with confidence. Get value.

Choose GE Healthcare's AssurePoint OnDemand Services for sourcing quality parts – backed by a company known as a global leader in quality. Call your GE Healthcare representative today. Find out how you can procure parts in ways that work within your budget and help support the quality care you promise your patients.
